OBJECTIVE

AI/ML Engineer and Software Developer with hands-on experience building enterprise-grade intelligent document processing pipelines, cloud LLM integrations, and privacy-compliance architectures. Seeking opportunities to apply Computer Vision, NLP, and advanced Retrieval-Augmented Generation (RAG) frameworks to real-world industrial challenges.

EDUCATION

B.Tech in Computer Science and Engineering Expected 2028
MIT World Peace University (MIT-WPU), Pune

Diploma in CSE (Artificial Intelligence and Data Science) 2022 – 2025
MIT World Peace University (MIT-WPU), Pune

SKILLS

Languages	Python, JavaScript, HTML5, CSS3, SQL
AI, ML & RAG	PyTorch, Scikit-learn, LangChain, Vector DBs, Hybrid Search, Embeddings
Cloud & LLM Tools	Azure AI Foundry, Amazon Bedrock, Anthropic API, GPT-4o, Claude 3.7 Sonnet
Document AI & NLP	Azure Document Intelligence, Microsoft Presidio, spaCy
Computer Vision	OpenCV, Object Detection, Instance Segmentation, Image Processing, YOLOv8/11-Seg
Data Science & Web	NumPy, Pandas, Matplotlib, React, FastAPI, Tailwind CSS
Tools & Platforms	Git, GitHub, VS Code, Jupyter Notebooks, Google Colab, Hugging Face

EXPERIENCE

AI / Machine Learning Engineering Intern Jan 2025 – June 2025
Quantyc AI *Remote, Indonesia*

- **Intelligent Document Processing:** Built production extraction pipelines for financial documents using **Azure Document Intelligence**; leveraged prebuilt layouts, custom **Neural & Template models**, and **polygon-based bounding box methods** to optimize OCR accuracy.
- **LLM Engineering & Evaluation:** Evaluated and integrated multi-format OCR pipelines leveraging **GPT-4o via Azure AI Foundry** and **Claude 3.5/3.7 Sonnet via Amazon Bedrock**, establishing Claude 3.7 as the benchmark for unstructured data extraction.
- **Cost Optimization:** Architected an asynchronous workflow utilizing **Anthropic Batch API**, cutting operational LLM token costs by **50%** while maintaining extraction fidelity.
- **Data Privacy & PII Masking:** Engineered an automated redaction engine using **Microsoft Presidio** and **spaCy NLP**; developed custom scripts to detect, encrypt, or visually blur PII across structured/unstructured files and images.

PROJECTS

- **Enterprise Multimodal RAG Pipeline (In Development)**
  Architected a real-time ingestion engine featuring structural parsing, semantic chunking, and multimodal embedding indexing. Implemented a hybrid search strategy combining vector similarity with metadata filtering, assembly-mapping conversation history to an open-source LLM.
- **Visual Quality-Inspection Agent for Defect Detection**
  Developed an end-to-end computer vision pipeline using **YOLOv8-Seg** to inspect assembly line video frames for surface paint defects, dents, and missing fasteners. Engineered synthetic data pipelines to augment training images with simulated lighting variations and occlusions.
